

WHAT IS CLAIMED IS:

1. A wet-proof ball structure comprising:

a ball core;

5 at least two wet-proof elastic bags enclosing the ball core; each wet-proof elastic bag having at least one opening, the openings of the at least two wet-proof elastic bags being not overlapped; and

a cover enclosing the at least two wet-proof elastic bags.

2. The wet-proof ball structure as claimed in claim 1, wherein each wet-proof elastic bag is made of two sheet, each sheet has a shape like "8".

10 3. The wet-proof ball structure as claimed in claim 1, wherein if the wet-proof elastic bag does not enclose the ball core, the volume of each wet-proof elastic bag is smaller than that of the ball core.
